For the fulfillment of,

Object-Oriented Programming Lab

Department of Computer Engineering

University of Engineering and Technology, Lahore

Lab 7

```
import java.io.File;
import java.io.FileWriter;
import java.io.IOException;
import java.util.Scanner;

public class Main {
    public static void main(String[] args) throws IOException {

        File file = new File("data.txt");
        try {
            if(file.createNewFile()){
                System.out.println("File created");
            }
            else{
                System.out.println("File already exists");
            }
        } catch (IOException e) {
            System.out.println("Error creating file");
        }

        FileWriter writer = new FileWriter("data.txt");
        try {
            writer.write("Hello World\n");
            writer.write("I am Java");
            System.out.println("File written");
        } catch (IOException e) {
            System.out.println("Error writing file");
        }

        writer.close();

        try {
            Scanner Reader = new Scanner(file);

            while (Reader.hasNextLine()) {
                String data = Reader.nextLine();
                System.out.println(data);
            }
        }
```

```
Reader.close();
```

```
} catch (Exception e) {
```

```
    System.out.println("Error reading file.");
```

```
}
```

```
}
```

```
}
```
